

*Attention:*

School and District Leaders and Administrators

**FREE Workshop**

## School Leader Development: Building 21st-Century Schools

*Presenters:* **Jason Borgen**, Project Coordinator, TICAL Project and **Tim Landeck**, Technology Director, PVUSD

One of the greatest challenges facing principals and school leaders today is developing the skills to create “21st-century schools” – institutions that integrate the use of information and communication technology (ICT) into core teaching and learning functions while increasing efficiency through administrative processes.

A unique online curriculum, *School Leader Development: Building 21st-Century Schools* combines video challenge questions, discussion, and expert resources to focus on the following issues facing school leaders:

- The dimensions of change within schools in the 21st century
- Guiding student learning
- Strategies for success for all students
- Innovative approaches for education
- Strong leadership for all schools

---

*Audience:* School Leaders from primary and secondary schools and district offices, including principals, administrators, and leadership teams with master teachers

---

*Register early - space is limited to 24 participants.*

**Tuesday, March 30th, 2010**

8:30 am - 4:00 pm (lunch will be provided)

SCCOE - Pacific/Ocean Room

*Bring your CD-ROM equipped Laptop.*
